

## Background always transparent in OverLib

I just spent an infuriating hour trying to work out why the tooltips output by nBill, using OverLib, were always coming out with a transparent background - even if I explicitly specified a background colour when calling OverLib. I tried sending commands in the call to OverLib and setting the javascript variable, but the commands were just ignored.

It seems the solution lies in your template's CSS file...

Thanks to this forum post: <http://forum.joomla.org/viewtopic.php?f=541&t=306259>, I was able to fix the problem on my template by adding the following to the CSS file:

```
.ol-foreground
{
    background-color: #EEF3FF;
    border: solid 1px #215DC6;
    padding: 5px;
}
```

Naturally, you will need to adjust the colour values to suit your template.
